GREETINGS FOR 1941

Every year at this time thoughts of flower lovers turn to their gardens, and it is with pleasure that we offer this list of dahlia tubers for your approval. We have spared no time or expense to make our bulbs the best that can be grown. You will find the best of the tried and dependable varieties along with the new and popular kinds. We have made an effort to adjust our prices to as low a level as is consistent with the high quality we endeavor to maintain.

We wish to invite all flower lovers to visit our gardens during blooming season. Here you will see several hundred varieties of dahlias growing and blooming. Barring storms and frost, our gardens are at their best from late August to middle and late October. We are located seven miles S. E. of Gresham on the Mt. Hood Loop Highway at the junction of highways 212 and 50.

ORDER EARLY

We start shipping retail orders as early as April 1st so it is well to order early to insure getting the varieties you wish before the supply is exhausted.

GUARANTEE

We guarantee all tubers we send out to grow and be true to name, but will not be responsible for any more than the purchase price represented by the replacement of bulbs. In case a tuber does not grow, it must be returned to us by July 1st of the year purchased, with our label attached, in order to be booked for replacement the following year. However, we try to send out only tubers with good eyes or sprouts that we feel certain will grow if given a chance. Any extras we include are not subject to this guarantee.

WE FURNISH CULTURAL DIRECTIONS WITH EACH DAHLIA ORDER

Please send cash with order in whatever form is most convenient. We prepay all retail orders except where otherwise specified.

SUBSTITUTION

We do not substitute unless permission is granted or a second choice is listed.

CHRYSANTHEMUMS

We grow about four acres of pompon chrysanthemums for cut flower purposes. These range in color from white, yellow and pink, to the deepest shades of red and bronze. Most years we are able to harvest all these varieties as they are of the early types. We can supply these plant divisions in assorted dozens at \$1.00. Write for quantity prices.
